

Paris, September 29, 2015
Press Release

Coursera - Institut Mines-Télécom Agreement: With this partnership agreement, Institut Mines-Télécom joins the elite circle of universities selected to publish their MOOCs on the leading global platform.

With 14 MOOCs for the French-speaking community to its credit, Institut Mines-Télécom is spreading to the world.

As a MOOC pioneer in France, Institut Mines-Télécom is offering its courses in the French language on the FUN platform. Following the success of these courses and first certification experiences (*Data Network Principles* MOOC), the Institute has continued its expansion by joining with the world-leading platform. "We are proud to have come to this agreement with Coursera, as it is a recognition of our excellence and will afford learners around the world all the benefit of our courses", explains Nicolas Sennequier, the Institute's Director of e-Learning.

"Innovating in a Digital World": a knowledge toolkit for the new era of digital disruption thanks to the Institute's first MOOC in English

With "Innovating in a Digital World", Institut Mines-Télécom provides a knowledge toolkit for the ongoing digital revolution. Learners will discover 15 concepts that are essential for understanding the new mechanisms of digital business and innovation. <https://www.coursera.org/learn/innovating-digital-world>

For Daphne Koller, President of Coursera, "The partnership with Institut Mines-Télécom is an important addition to the agreements that we already have with French institutions of excellence. This first illustration of our partnership with France's leading group of engineering and management graduate schools is extremely promising and points to a great future."
